

MINIMUM DISCLOSURE DOCUMENT

Peregrine Capital Global Equity Fund

Fund objective

The goal of the Peregrine Capital Global Equity Fund (the "Fund") is to achieve medium to long term capital growth by predominantly investing in global equity markets.

What does the Fund invest in?

The Fund invests primarily in global equity and equity-related securities, global debt and debt-related securities. The underlying fund only invests in assets which are permitted by the UCITS Regulations.

Important fund characteristics and risks

The investment managers seek to identify undervalued securities that offer strong upside potential over the medium to longer term. They conduct rigorous research to understand the companies and securities that they invest in, to determine their intrinsic value, which allows them to identify opportunities with the best expected returns. The investment managers aim to reduce the risk of permanent capital loss through careful selection of investable securities, and by applying permitted hedging practices.

Who should consider investing in the fund?

The Fund is for you if:

- You intend investing over the medium to long term and have a high-risk appetite
- You seek exposure to diversified international equities that will provide long-term capital growth
- You wish to invest in international assets without having to personally expatriate Rands
- You are comfortable with global stock market and currency fluctuation and risk of capital loss
- You would like to use the Fund as a global equity 'building block' in a diversified multi-asset class portfolio

Investment strategy and mandate

The Fund is managed by Peregrine Capital International. Peregrine Capital International employs a bottom-up stock selection process based on rigorous and disciplined fundamental research, drawing on experience of covering the sectors and companies over many years. Peregrine Capital International focuses its time on building detailed knowledge of specific companies, rather than predicting the economic trends or taking a view on overall markets. The Fund mandate is founded on the UCITS principles for a general equity fund, and position sizes are limited per these regulatory restrictions.

Risk warning

The investments of the Peregrine Capital Global Equity Fund (the "Fund") are subject to market fluctuations and the risks inherent in all investments and there can be no assurance that an investment will retain its value or that appreciation will occur. The risks associated with investing in the Fund include, but are not limited to the following: currency risks, general market risks (such as general movements in interest rates; external factors [war, natural disasters and the like]); changes to the law and regulatory frameworks; governmental policy changes; global, regional or national economic developments and risks related to a specific security (such as the possibility of a company's credit rating being downgraded). Foreign securities are included in the Fund and there may be potential constraints on liquidity and the repatriation of currency, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks and potential limitations on the availability of market information. Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

General information

This document is the minimum disclosure document ("MDD") required by Board Notice 92 of 2014 published by the Financial Sector Conduct Authority under the Collective Investment Schemes Control Act, No. 45 of 2002. Collective Investment Schemes in Securities ("CIS") should be considered as medium to long-term investments. The price of shares and the income from shares can go down as well as up and investors may not realize the value of their initial investment. Accordingly, an investment in the Fund should be viewed as a medium to long-term investment. Past performance may not be a reliable guide to future performance. CIS are traded at the ruling price and can engage in scrip lending and borrowing. A schedule of fees, charges and maximum commissions is available on request from the Manager. Neither the Manager, Prescient, Peregrine Capital International nor Peregrine Capital provides any guarantee either with respect to the capital or the investment performance of the Fund. Prescient has the right to close the Fund to investments from new investors, and/or to close the Fund to new investments, and/or to accept new investments only from certain persons or groups of persons, and/or to limit or suspend the creation and issue of new shares, in each case on such terms as it may determine, in order to manage the Fund more efficiently in accordance with its mandate. Where any forecasts or commentary about the expected future performance of asset classes, or the market in general, are made in this document, please note that neither the Manager, Peregrine Capital International, Peregrine Capital nor Prescient guarantee that such forecasts or commentary will occur. Peregrine Capital Global Equity Fund is a sub-fund under Prescient Global Funds ICAV, a UCITS fund authorised by the Central Bank of Ireland which Scheme and is also authorised by the FSCA under Section 65 of the Collective Investment Schemes Control Act, 2002. Authorisation of the Fund by the Central Bank of Ireland is not an endorsement or guarantee nor is the Central Bank of Ireland responsible for the contents of the prospectus. Authorisation by the Central Bank of Ireland shall not constitute a warranty as to the performance of the Fund and the Central Bank of Ireland shall not be liable for the performance or default of the Prescient Global Funds ICAV.

Calculation of the NAV and price

The value of shares is calculated on a net asset value ("NAV") basis. The NAV is the total value of all assets in the Fund including any income accruals and less any permissible deductions (which may include audit fees, brokerage, service fees, securities transfer tax and bank charges) for a particular class. The price of shares is calculated by dividing the NAV by the number of shares in issue for that class. The price of shares is published monthly in the MDD, which is available at www.peregrine.co.za.

Investment performance

Performance figures are provided by the Fund Manager. The performance calculated and shown is that of the Fund. Performance has been calculated using net NAV to NAV numbers with income reinvested. The investment performance for each period shown reflects the net return for investors who have been fully invested for that period. Individual investor investment performance may differ as a result of initial fees (if applicable), the actual investment date, the date of reinvestment of distributions and/or distribution dates, and dividend withholding tax. Where periods of longer than 1 year are used in calculating past performance, certain figures may be annualised. Annualised performance is the average return per year over the period. Actual annual figures and investment performance calculations are available on request from Prescient.

Performance fees

An annual management fee of 1.25% and a performance fee of 15% above the hurdle (MSCI AWCI) is charged to the fund. A high water mark ("HWM") is applied, which ensures that performance fees will only be charged on new performance. There is no cap on the USD amount of performance fees.

Limitation of liability

This MDD has been compiled for information purposes only and does not take into account the needs or circumstances of any person or constitute advice of any kind. It is not an offer to sell participatory interests or an invitation to invest. The information and opinions in this MDD have been recorded by Prescient, the Manager, Peregrine Capital International and Peregrine Capital in good faith from sources believed to be reliable, but no representation or warranty, express or implied, is made as to their accuracy, completeness or correctness. The Manager, Prescient and Peregrine Capital accordingly accept no liability whatsoever for any direct, indirect or consequential loss arising from the use of this MDD or its contents.

Glossary

Annualised performance: reflects longer term performance rescaled to a 1-year period. Annualised performance is the average return per year over the period.

High Water Mark is the highest level of performance achieved over a specified period.

Maximum drawdown: the largest peak to trough decline during a specific period of investment

Total Expense Ratio: includes the annual service charge, performance fee and administrative costs, but excludes VAT and fund transaction costs, expressed as a percentage of the average monthly value of the fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return.

Transaction Costs: are the costs relating to the buying and selling of the fund's underlying assets, expressed as a percentage of the NAV. Transaction costs are a necessary cost in managing the fund and may impact the returns.

Total Investment Charge is the sum of the TER and TC. These should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund and the investment decisions of the fund manager. Since the fund returns are quoted after the deduction of these expenses, the TER and TC should not be deducted again from published returns.
