

MINIMUM DISCLOSURE DOCUMENT

Peregrine Capital Pure Hedge H4 Retail Hedge Fund

31 August 2021

Fund objective

The goal of the Pure Hedge Fund is to offer investment stability and downside protection while growing investors' purchasing power. We aim to deliver returns above inflation over the medium term.

What does the fund invest in?

The fund can invest in a wide range of assets, such as listed shares, bonds and property, as well as cash and cash equivalents, both in South Africa and internationally.

Important fund characteristics and risks

The fund managers seek to identify undervalued securities that offer strong upside potential over the medium to longer term. We conduct rigorous research to understand the companies and securities that we invest in to determine their intrinsic value, which allows us to identify opportunities with the best expected returns. The fund typically invests in a wide range of assets, with a preference for shares and fixed income instruments. The fund managers strive to reduce risk through disciplined hedging practices and by maintaining high levels of liquidity to minimise correlation to the equity market.

Who should consider investing in the fund?

The Pure Hedge Fund is suitable for you if:

- You want to achieve stable returns that exceed inflation and protect your capital
- You are comfortable to assume a low level of market risk
- You are ideally investing for at least two years

The graph above is for illustrative purposes only, and reflects actual fund performance and notional performance of the comparative indices, based on a lump sum contribution on the inception date of the fund. Performance is shown net of all fund charges and expenses and includes the reinvestment of distributions.

Net Returns	Pure Hedge Fund	SA Multi Asset-Low Equity Category	CPI

Important Notes on calculation of net returns and risk measures:

The Pure Hedge Fund does not have a benchmark and does not contribute towards the return of the ASISA SA Multi Asset - Low Equity Category. The data for the ASISA SA Multi Asset - Low Equity Category and CPI is provided for comparative purposes.

Fund commentary

The Pure Hedge Fund has generated a net return of 1.96% in 2021 compared to 8.51% for the SA Multi Asset - Low Equity Category. The net return for the month of August 2021 was 0.47%. The ongoing uncertainties around COVID-19, global growth trajectories, inflation and local politics continue to create significant volatility in asset prices. Our hedge positions have done well in offsetting market drawdowns. Positive contributions from the Bank, Preference Share and Oil & Gas sectors assisted the fund over the month, while the Travel & Leisure and Media sectors detracted from fund performance. Peregrine Capital remains resolutely committed to seeking out investment opportunities during these uncertain times, based on detailed, bottom up, fundamental research and deploying capital rationally where market prices deviate materially from fundamental value.

Total Expense Ratio (TER) and Transaction Costs (TC)

TER and TC breakdown for the 1 and 3 year period ending 30 June 2021:

	1yr%	3yr%
Service charge	1.23%	1.23%
Performance fee	0.78%	1.32%
VAT	0.30%	0.38%
Other costs	0.04%	0.04%
Total Expense Ratio (TER)	2.35%	2.97%
Transaction Costs (TC)	1.42%	1.64%
Total Investment Charge (TIC)	3.77%	4.61%

Glossary

Annualised performance: reflects longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period.

Maximum drawdown: the largest peak to trough decline during a specific period of investment

Total Expense Ratio: includes the annual service charge, performance fee and administrative costs, but excludes VAT and fund transaction costs, expressed as a percentage of the average monthly value of the fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return.

Transaction Costs: are the costs relating to the buying and selling of the fund's underlying assets, expressed as a percentage of the NAV. Transaction costs are a necessary cost in managing the fund and may impact the returns.

Total Investment Charge is the sum of the TER and TC. These should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund and the investment decisions of the fund manager. Since the fund returns are quoted after the deduction of these expenses, the TER and TC should not be deducted again from published returns.

Investment strategy and mandate

The fund invests across asset classes, both locally and offshore. Significant exposures may be taken in individual positions from time to time. Peregrine Capital employs a bottom up stock selection process based on rigorous and disciplined fundamental research, drawing on experience of covering the sectors and companies over many years. Peregrine Capital focuses its time on building up a detailed understanding of specific companies, rather than predicting the economic trends or taking a view on overall markets.

Risk warning

The risks associated with investing in the fund include, but are not limited to the following: general market risks (such as general movements in interest rates; external factors [war, natural disasters and such like]); changes to the law and regulatory frameworks; governmental policy changes; global, regional or national economic developments and risks related to a specific security (such as the possibility of a company's credit rating being downgraded).

The fund managers may use leverage. Leverage is the use of various financial instruments or borrowed capital, such as margin, to increase the potential return of an investment. Leverage includes the use of derivatives. Derivatives derive their value from the value of an underlying asset. The use of leverage within the fund involves risk because depending on how the leverage is structured, the fund's losses or gains may be unlimited. Other risks include counterparty risk and liquidity risk. The fund may take significant exposures in individual positions which may create concentration risk. Counterparty risk is the risk that the other party to a transaction may not be able to perform its obligations. Liquidity risk means that during volatile periods, the tradability of certain instruments may be impeded. Where foreign securities are included in the fund there may be potential constraints on liquidity and the repatriation of currency, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks and potential limitations on the availability of market information.

General information

This document is the minimum disclosure document ("MDD") required by Board Notice 92 of 2014 published by the Financial Sector Conduct Authority under the Collective Investment Schemes Control Act, No. 45 of 2002. Collective Investment Schemes in Hedge Funds should be considered as medium to long-term investments. The value may go down as well as up and past performance is not necessarily a guide to future performance. Collective Investment Schemes in Hedge Funds are traded at the ruling price and can engage in scrip lending and borrowing. A schedule of fees, charges and maximum commissions is available on request from the Manager. Neither the Manager nor Peregrine Capital provides any guarantee either with respect to the capital or the investment performance of the fund. The Manager has the right to close the fund to investments from new investors, and/or to close the fund to new investments, and/or to accept new investments only from certain persons or groups of persons, and/or to limit or suspend the creation and issue of new participatory interests, in each case on such terms as it may determine, if such restrictions will, in the Manager's view, benefit the fund or the effective management thereof or for any other reason whatsoever. Where any forecasts or commentary about the expected future performance of asset classes, or the market in general, are made in this document, please note that neither Peregrine Capital nor H4 guarantee that such forecasts or commentary will occur.

Calculation of the NAV and price

The value of participatory interests (also referred to as units) is calculated on a net asset value ("NAV") basis. The NAV is the total value of all assets in the fund including any income accruals and less any permissible deductions (which may include audit fees, brokerage, service fees, securities transfer tax and bank charges) for a particular class. The price of participatory interests is calculated by dividing the NAV by the number of participatory interests in issue for that class. The price of participatory interests is published monthly in the MDD, which is available at www.peregrine.co.za.

Investment performance

The performance calculated and shown is that of the fund. Performance has been calculated using net NAV to NAV numbers with income reinvested. The investment performance for each period shown reflects the net return for investors who have been fully invested for that period. Individual investor investment performance may differ as a result of initial fees (if applicable), the actual investment date, the date of reinvestment of distributions and/or distribution dates, and dividend withholding tax. Where periods of longer than 1 year are used in calculating past performance, certain figures may be annualised. Annualised performance is the average return per year over the period. Actual annual figures and investment performance calculations are available on request from H4.

Performance fees

A management and performance fee is charged to the fund. Performance fees are payable on positive performance using a participation rate of 20% above the hurdle (STEFOCAD index).

Total Expense Ratio for year ended 31 March 2021 3.59%

A high water mark ("HWM") is applied, which ensures that performance fees will only be charged on new performance. There is no cap on the Rand amount of performance fees.

Disclosure in respect of third party named portfolios

The fund is a third party named portfolio. A hosted or third party named portfolio bears the name of the Manager and the fund manager. The Manager retains full legal responsibility for hosted/third party named portfolios.
